SUBJECT INDEX, VOLUME 56

Acetaldehyde, polymerization, S4
Acrylamide, effect of gases on ESR spectra, 251
  polymerization in the solid state, S1
Acrylic fiber, microheterogeneity, S19
Acrylonitrile, anionic polymerization, 539
  polymerization with *n*-butyllithium, 203
Amlose, NMR study, S21
Anionic polymerization, acrylonitrile, 539
Block polymerization, kinetics, 359
Bonding, urethane elastomers, 455
n-Butyllithium, polymerization of acrylonitrile, 203
Calorimeter, construction and new measurements, 313
ε-Caprolactam, space group, S30
Catalyst, titanium tetrafluoride, 267
  Ziegler-Natta in copolymerization, 391
Cellulose, crystal structure, 339
  heterogeneous hydrolysis, 425
  stress-induced transition, S13
Chemical shifts, bulk crystalline polymer, S16
Chloroprene, emulsion polymerization, 47
Conversion, mechanicochemical, 477
Copolymerization, effect on stereoregular polyvinyl chloride, 501
  freezing of starch solutions, 477
  theory applied on memory devices, 435
  with Ziegler-Natta catalysts, 391
Copolymers, carbonate/urethanes, 1
  dipole moments and molecular structure, 213
  vinyldiphenylphosphine, 533
Crystal structure, cellulose I, 339
Crystalline polymer, chemical shifts, S16
Crystals, thickness in high polymers, 19
Cu(II), interaction with polymethacrylic acid, S23
Cyclopentadienyl sodium, in acrylonitrile polymerization, 539
Degree of polymerization, number-average, 233
Dielectric dispersion, protein solutions, 257
Dipole moments, copolymers, 213
Dissociation constants, polycarboxylic acids, S25
Emulsion polymerization, styrene and chloroprene, 47
Epoxy resins, thermal degradation, 383
Equilibria, osmotic and Donnan, polyacrylic acid–sodium bromide solutions, 115
ESR spectra, effect of gases, 251
  irradiated polypropylene, 33
Esters, polyvinyl alcohol and sulfuric acid, 245
Ethyl cellulose, diffusion of styrene in, 57
  grafting of styrene in film. 69
Ethyllithium, decomposition in tetrahydrofuran, S17
Ferry's method of reduced variables, validity, 449
Fluorocarbons, free energies of formation, 277
Fractionation, isotactic polystyrene, S7
Free energies, formation of fluorocarbons, 277
Free-radical polymerization, molecular weight distribution, 441
Grafting, styrene in ethyl cellulose film, 69
Hydrolysis, cellulose with high polymer acids, 425
Hydroxyl group, in propylene glycols, 297
Intrinsic viscosity, polystyrene, and molecular weight relationship, S28
Isobutyl vinyl ether, stereospecific polymerization, 27
Light scattering, unfractionated poly-(*n*-docosyl methacrylate), 305
Memory devices, and copolymerization theory, 435
Methacrylamide, effect of gases on ESR spectra, 251
3-Methyl-5-isopropenylpyrazoles and derivatives, synthesis, 465
Microheterogeneity, acrylic fiber, S19
Molecular structure, copolymers, 213
Molecular weight, distribution in free-radical polymerizations, 441
  polystyrene, and intrinsic viscosity relationship, S28
Monomers and polymers, new, synthesis, 465
New monomers and polymers, synthesis, 465
NMR study, amylose, S21
Nomenclature, steric regularity in high polymers, 153
Number-average degree of polymerization, 233
2-Oxohexamethyleneimine, space group, S30
Photolysis, poly-α-methylstyrene, 507
Polyacrylic acid–sodium bromide solutions, equilibria, 115
Polyacrylonitrile, thermal coloration and insolubilization, 189
Polycarbons, copoly(carbonate/urethanes) from, 1
Polycarboxylic acids, dissociation constants, S25
Poly(*n*-docosyl methacrylate), light scattering, 305
Polyelectrolytes, calculation of thermodynamic properties, 97
  precipitation by salts, 133
Polyesters, new syntheses, 417
Polyethenesulfonamide, radiation-initiated, 11
Polyethylene, unit cell variations, 403, 409

Polymethacrylic acid, potentiometry and interaction with Cu(II), S23
Polymethyl methacrylate, characterization, 375
Poly-α-methylstyrene, photolysis, 507
Polyproplene, ESR studies, 33
thermal degradation, 485
Polystyrene, intrinsic viscosity and molecular weight relationship, S28
isotactic, fractionation, S7
Polytetrafluoroethylene, thermodynamics of formation and depolymerization, 277
Polyvinyl acetate, viscosities of dilute solutions, 519
Polyvinyl alcohol, esters, 245
Poly(vinyl chloride), glass transition and melting point, 225
stereoregular, effect of copolymerization, 501
Polyvinyl fluoride, properties, 273
Poly(vinylhydroquinones), new methylated, 83
Propylene glycols, hydroxyl group content, 297
Protein solutions, dielectric dispersion, 257
Radiation, initiating polyethenesulfonamide, 11
Reactivity ratios, two α-olefin pairs, 391
Sodium bromide–polyacrylic acid solutions, equilibria, 115
Solid state polymerization, acrylamide, S1
Space group, ε-caprolactam, S30
Spherulite, measurements of growth rates, S9
Starch, low-angle spacing, S10
Stereoregular polymers, characterization, 375
polyvinyl chloride, effect of copolymerization, 501
Stereoregularity, nomenclature, 153
Stereospecific polymerization, isobutyl vinyl ether, 27
Styrene, diffusion in ethyl cellulose, 57
emulsion polymerization, 47
grafting in ethyl cellulose film, 69
Sulfuric acid esters, 245
Swelling, polymer systems in solvents, 163, 175
Systems, swelling in solvents, 163, 175
Tetrahydrofuran, ethyllithium decomposition in, S17
Thermal degradation, epoxy resins, 383
polypropylene, 485
Thermodynamic properties, polyelectrolytes in presence of salt, 97
Titanium tetrafluoride, catalyst for organic reactions, 267
Unit cell variations, with branching, polyethylene, 409
with temperature, polyethylene, 403
Urethane elastomers, bonding, 455
Variables, reduced, validity of Ferry's method, 449
Vinyldiphenylphosphine, polymers and copolymers, 533
Viscosities, dilute solutions of polyvinyl acetate, 519
